PHP Developer

Description

About the Role:

We are looking for a skilled **PHP Developer** to join our growing development team. The ideal candidate will be responsible for developing, testing, and maintaining dynamic web applications and backend systems using PHP and related frameworks.

Responsibilities

Key Responsibilities:

- Develop and maintain web applications using **PHP, MySQL, HTML, CSS, and JavaScript**.
- Work on **API integration** and **backend logic**.
- Write clean, scalable, and well-documented code.
- Collaborate with designers and front-end developers to deliver high-quality web projects.
- Troubleshoot, test, and maintain the core product software to ensure strong optimization and functionality.
- Participate in code reviews and team meetings.

Qualifications

Required Skills:

- Strong knowledge of **PHP (Core PHP / Laravel / CodeIgniter)**.
- Good understanding of **MySQL databases**.
- Basic knowledge of **front-end technologies** (HTML5, CSS3, JavaScript, jQuery).
- Familiarity with **RESTful APIs** and version control (Git).
- Problem-solving skills and attention to detail.
